

Table of Contents

Abstract.....	I
Zusammenfassung.....	III
Abbreviations and definitions	V
1. Introduction	1
1.1. World potato production	1
1.2. The importance of seed potato production development	2
1.3. Why high quality seed potato?	3
1.4. Limitations facing seed potato production	4
2. Literature review.....	6
2.1. Potato - botanical characteristic and growing conditions.....	6
2.1.1. Botanical description.....	7
2.1.2. Growing conditions and growth stages	7
2.1.3. Potato nutritional importance and value.....	10
2.2. Potato propagation methods	11
2.2.1. True seed potato (TPS).....	11
2.2.2. Vegetative propagation	12
2.2.2.1. In vitro plantlets	13
2.2.2.2. In vitro microtubers	13
2.2.2.3. Ex vivo minitubers	15
2.3. Seed potato production techniques.....	16
2.3.1. In vitro plantlets and microtuber production	17
2.3.1.1. Semi-solid medium	17
2.3.1.2. Liquid medium	17
2.3.2. Minituber production.....	21
2.3.2.1. Substrate culture system.....	22
2.3.2.2. Hydroponic system.....	22
2.4. Seed potato production management	26
2.5. Seed potato production strategies in the world	28
2.5.1. Pre-basic seed potato	28
2.5.2. Basic seed potato.....	29
2.5.3. Certified seed potato.....	29
2.6. Potato production history in Syria.....	30
3. Aim and Objectives	32
4. Materials and Methods	36
4.1. Plant material.....	36
4.2. In vitro culture	37
4.2.1. In vitro cultures establishment and maintenance.....	37
4.2.2. In vitro culture media	38
4.2.3. In vitro culture and growth conditions	40
4.2.4. In vitro culture techniques	40
4.2.4.1. Semi-solid system	41
4.2.4.2. Temporary immersion systems	42
4.2.5. Shoot multiplication experiments.....	44
4.2.6. Microtuber production experiments	47
4.3. Minituber production experiments	49
4.3.1. Aeroponic cultivation system.....	49
4.3.1.1. Nutrient solutions used in aeroponic system.....	51

4.3.1.2. Preparation of the nutrient solution.....	51
4.3.1.3. Minituber production using the aeroponic system	52
4.3.2. Substrate cultivation system	54
4.3.2.1. Minituber production from in vitro plants	54
4.3.2.2. Minituber production from in vitro microtubers.....	55
4.3.2.3. Studying the productivity of minitubers obtained as well from the aeroponic as and from substrate system.....	56
4.4. Seed potato production in the field	57
4.5. Methodology for determination of tuber quality	57
4.5.1. Effect of minituber size.....	57
4.5.2. Dry matter and starch content	59
4.5.3. Tuber texture (firmness).....	60
4.5.4. Effect of minituber physiological age	61
4.6. Statistical data analyses	62
5. Results and Discussion.....	63
5.1. In-vitro multiplication of potato shoots	63
5.1.1. Effect of culture system on the shoot multiplication.....	63
5.1.2. Effect of culture system on the changes of shoot multiplication medium	69
5.2. In-vitro production of potato microtubers	75
5.2.1. Effect of culture system and potato cultivar on the microtuber production.....	75
5.2.2. Effect of culture system on the culture medium parameters during microtuber production	83
5.3. Minituber production	91
5.3.1. Effect of plant density using aeroponic cultivation system.....	92
5.3.2. Effect of nitrogen concentration and in vitro subcultures on minituber production using the aeroponic system.....	101
5.3.3. Effect of in vitro subcultures on minituber production using the substrate culture system	109
5.4. Evaluation of potato minitubers propagated with different methods – in the substrate culture and on the field	113
5.4.1. Production of seed potatoes in substrate culture – using minitubers obtained from substrate culture and aeroponics.....	113
5.4.2. Production of seed potatoes in substrate and field culture – using minitubers obtained from aeroponics	117
5.5. Internal quality of minitubers and seed potato obtained from different culture systems.....	126
5.5.1. Dry matter and starch content	127
5.5.2. Minituber physiological age.....	129
6. General Discussion.....	132
6.1. Shoot multiplication and microtuber production	132
6.2. Minituber production	133
6.3. Comparison of different culture systems and plant materials applied for seed potato production	136
7. Conclusion and Recommendations	139
Bibliography.....	142
List of figures	157
List of tables	160
