

Table of Contents

Glossary	12
I. Introduction	15
1.2 Problem situation	19
1.3 Research questions and objectives	21
1.4 Purpose and significance	21
1.5. Thesis structure	23
II. Historical background and introduction to the Camëntsá and Inga indigenous communities	25
2.1 From post-colonial times to the last century	25
2.2 <i>Camëntsá</i> and <i>Inga</i> worldview	36
2.3 Social organisation	38
2.4 <i>Inga</i> and <i>Camëntsá</i> traditional agriculture	40
III. The conceptual and theoretical framework	41
3.1 Agroforestry systems theoretical concepts	41
3.1.1 Agroforestry systems boosting productivity	42
3.1.2 Agroforestry systems for food security and livelihood	42
3.1.3 Agroforestry as a buffer of natural capital conservation	47
3.2 The ecosystem services conceptual framework	47
3.2.1 The cascade conceptual framework	48
3.2.2 Classification of ecosystem services	50
3.2.3 Valuation of ecosystem services	52
3.2.4 Ecosystem services from agroforestry	57
3.3 Ecosystem services framework as a foundation of this study	57
IV. Methodology	65
4.1 Study area	65
4.2 Mixed methods: using qualitative and quantitative research	66
4.3 Research design	67
4.3.1 Explorative empirical research	67
4.3.2 Unit of analysis	68
4.3.3 Population and sampling	68
4.3.4 Data collection	70
4.4 Data analysis	74

4.5 Ecosystem services valuation analysis	76
V. Results and discussion	79
5.1 <i>Inga</i> and <i>Camëntsá</i> indigenous agroforestry systems in the Sibundoy Valley	79
5.1.1 Agrosilvopastoral systems	80
5.1.2 Silvopastoral systems	81
5.1.3 Agrisilvicultural systems	84
5.1.4 Natural forest	87
5.1.5 The farm household	88
5.1.6 Households' economic activities	91
5.1.7 Current context changes	93
5.2 Agroforestry systems assessment	98
5.2.1 Specific traits of agroforestry systems and natural forest	99
5.2.2 Farm household plant diversity	109
5.2.3 Cluster analysis	111
5.3 Agroforestry systems and natural forest valuation	119
5.3.1 Contingent valuation	121
5.3.2 Travel cost valuation	121
5.3.3 Related ecosystem services	123
VI. Summary of results, conclusions, and practical implications	133
6.1 Practical implications	137
6.2 Limitations and further research	139
Bibliography	141

Vandreé Julián Palacios Bucheli

The agroforestry systems of the Camëntsá and Inga indigenous communities in the Sibundoy Valley, Colombia
Socioeconomic and environmental assessment for ecosystem services valuation

2021 / 190 Seiten / 29,95 € / ISBN 978-3-96831-011-4
