

## TABLE OF CONTENTS

Table of Contents .....	I
abbreviations and Symbols.....	IV
List of Figures .....	VI
List of Tables.....	VIII
1. General Introduction.....	1
1.1 Background to the Study .....	1
1.2 Statement of problem and Justification for the study .....	3
1.3 Research Questions .....	4
1.3 Aim and Objectives of the study .....	4
1.5 Scope of the study .....	5
2. Literature review .....	6
2.1 Renewable Energy and Microbial Fuel Cells.....	6
2.2 MFC technology.....	7
2.2.1 Principle of operation of MFCs.....	8
2.2.2 MFC classification .....	9
2.2.3 MFC design and configuration.....	10
2.3 Soil MFC.....	13
2.4 factors affecting the performance of MFCs.....	15
2.4.1 Electrode materials.....	15
2.4.2 Electrode spacing .....	19
2.4.3 Substrate .....	20
2.4.4 Natural metabolism of bacteria .....	22
2.5 MFC Microbiology.....	23
2.5.1 Electroactive microbes in SMFCs.....	24
2.5.2. Electron transfer mechanisms by EAB in MFC .....	25
2.6 Electroanalytical/Electrochemical aspects of MFCs .....	26
2.6.1 Thermodynamics and Fundamentals of Power Generation in MFCs.....	27
2.6.2 Electrochemical techniques for the study of MFCs.....	29
2.7 Application of SMFCs.....	34
2.7.1 Biosensor .....	34
2.7.2 Bioremediation .....	35
2.8 Upscaling MFCs performance: prospects and challenges .....	37
3. Materials and Methods .....	39
3.1 Optimization of SMFC for sustainable bioelectricity generation.....	39
3.1.1 Experimental design for the optimization parameters .....	39
3.1.2 Design of SMFC reactors or vessels .....	40

---

3.1.3 electrode materials and preparation.....	41
3.1.4 Soil sampling and preparation.....	43
3.1.5 Preparation of substrate.....	44
3.1.6 Experimental Set-up and operation.....	44
3.1.7 Electrochemical responses measurement.....	46
3.1.8 Determination of microbiological response to the experimental treatments.....	47
3.1.9 Optimization of polymer binder for improved SM electrode.....	49
3.2 SMFC output amplification and storage.....	51
3.2.1 SMFC output power upscaling through different stack configurations.....	51
3.2.2 The use of boost-converters for SMFC output amplification.....	52
3.3 Bioremediation of petroleum hydrocarbon contaminated soil using SMFCs.....	53
3.3.1 Reactor design for the bioremediation experiment.....	53
3.3.2 Sampling of soil contaminated with petroleum hydrocarbons.....	54
3.3.3 Experimental set-up and operation of the SMFC for bioremediation.....	54
3.3.4 Petroleum hydrocarbons extraction and analyses.....	55
4. Optimization of SMFC for sustainable and practical bio-electricity production.....	57
4.1 influence of electrode material, spacing, and feeding frequency on SMFCs performance.....	58
4.1.1 Influence of electrode material.....	58
4.1.2 Influence of electrode spacing.....	59
4.1.3 Influence of substrate feeding duration.....	61
4.1.4 Modeling of the MFCs performance and interactive effects of two discrete variables.....	62
4.1.5 Model validation.....	75
4.1.6 Influence of external load (Rex) on the performance of SMFC.....	76
4.2 Influence of electrochemical properties of the electrodes.....	76
4.2.1 Cyclic voltammetry of the electrodes.....	76
4.2.2 Impedance spectroscopy of the electrodes.....	78
4.3 Influence of experimental treatments on soil microbial community diversity and microbes-electrode interaction.....	80
4.3.1 Determination of DNA concentration and purity.....	80
4.3.2. Variation of the SMFC microbial communities at the electrodes with time.....	82
4.3.3 Abundance and composition of the SMFCs microbial communities.....	86
4.3.4. A study of the microbes-electrode morphology through electron microscopy.....	88
4.4 Optimization of polymer binder for improved SM electrode.....	90
4.4.1 Surface morphology and chemical composition of electrodes with different binders.....	90
4.4.2 Maximum performance evaluation of the binders.....	92
4.4.3 Impedance spectroscopy of the binders.....	95
4.4.4 microbial community diversity of different polymeric binders in SMFC.....	96
4.4.5 Performance reproducibility and stability.....	105

4.5 SMFC output up-scale for real-world applications .....	107
4.5.1 series and parallel stack configurations.....	107
4.5.2 SMFC output amplification through electronic boost converters .....	110
5. Power generation and Bioremediation of polluted soil with SMFC.....	115
5.1 Power generation during bioremediation. ....	116
5.1.1 Power generation based on SMFC configuration.....	116
5.1.2 Influence of external Resistance and cascade configuration on the power generation capacity of SMFC during bioremediation. ....	119
5.2 Total petroleum hydrocarbon degradation in SMFC.....	123
5.3 Microbial community capable of petroleum hydrocarbon degradation in SMFC.....	129
6. General conclusions and recommendations .....	135
7. REFERENCES .....	IX
Appendices .....	XXXI
A1: Supporting Tables.....	XXXI
A2: supporting Figures.....	XXXIV
A3: Curriculum Vitae.....	XLIV
