Acknowledgements	i
Summary	vii
Terminology and notation	1
1 INTRODUCTION	3
1.1 Differential Operators	5
1.1.1 Background Information	5
1.1.2 Basic Notations	8
1.1.3 Hamiltonian Systems	10
1.1.4 M-Matrix	20
1.1.5 Asymptotic Integration	25
1.1.6 Transformation of the System into Levinson's Form	28
1.2 Difference Operators	35
1.2.1 Background Information	35
1.2.2 Hamiltonian System	37
1.2.3 <i>M</i> -Matrix	41
1.2.4 Asymptotic Summation	43
1.2.5 Transformation of the System	45
2 DIFFERENTIAL OPERATORS	51
2.1 Clusters of Size Two	53
2.2 Roots of Polynomials	63
2.3 The Dichotomy Condition	73
2.4 Deficiency Indices and Spectra	79
2.5 Operators on \mathbb{R}	93

2.6	Power Coefficients and Extensions	96
2.6.1	Power Coefficients	96
2.6.2	Extensions	102
3	DIFFERENCE OPERATORS	107
3.1	The Constant Coefficient	107
3.2	Even Order Difference Operators	111
3.3	Examples	121
4	FOURTH ORDER DIFFERENCE OPERATORS	125
4.1	System Formulation	126
4.2	Unbounded Coefficients	126
4.2.1	$p(t) \nearrow \infty, q(t)$ bounded	126
4.2.2	$p(t) \rightarrow -\infty, q(t)$ bounded	133
4.2.3	$ q(t) \rightarrow \infty$	134
4.3	Examples	135
	Bibliography	137
