List of Publications xiv

1 Introduction 1

2 State of the Art Research 7

2.1 Competitiveness and comparative advantages concepts and theories 7

2.2 Porters' diamond framework for analysing the edible oil subsector in Tanzania 8

2.3 Use of policy analysis matrix (PAM) for determining the competitiveness 12

2.4 Multiplier analysis using the computable general equilibrium model 13

3 Research Design and Methods 16

3.1 Research design 16

3.2 Research description and analytical methods 17

3.2.1 Case study area description 18

3.2.2 Data sources and collection 19

4 Results 21

4.1 Competitiveness and comparative advantage of the edible oil sub-sector in Tanzania 21

Article 1: 21

4.2 The impact of import substitution policy on the edible oil sub-sector in Tanzania... 30
Article 2:..... 30
4.3 The impact of government interventions on the edible oil sub-sector improving the agricultural sector production and the economy in Tanzania..... 47
Article 3:..... 47
4.4 The multiplier effect of enhancing the edible oil value chain in rural economy in Tanzania..... 65
Article 4:..... 65
5 Synthesis of Results..... 88
5.1 Are domestically produced edible oils competitive with imported edible oils, under the current production system and policy?..... 88
5.2 Does the imposition of tariff promote domestic edible oil production and sustainably raise the sector's contribution to economic growth in Tanzania?..... 89
5.3 What extent does an increase in production promote domestic edible oil supply and other sectors and its contribution to the Tanzanian economy in general?..... 93
5.4 How can sunflower value chain enhancement substantially improve the livelihood of rural poor and significantly contribute to a village economy? 95
6 Conclusion……..……...97
6.1 Limitations and further research..... 98
6.2 Implications.....100
6.3 Final remarks.....100
7 References.....102
8 Annex 113
8.1 Pictures case study visit and data collection in Tanzania.....113
Eigenständigkeitserklärung: 114
Statutory declaration:.....114

Acknowledgements

First, I explicitly thank Prof. Klaus Müller and PD Dr. Stefan Sieber for agreeing to supervise and guide me on this work. I owe special thanks to Dr. Stefan Sieber for supporting me both morally and materially in this undertaking; without any reservations, Dr. Sieber exposed me to the world of research and conferences, particularly for modeling, networking, and the peer-reviewed paper publication process.

Furthermore, my gratitude goes explicitly to the Germany Federal Ministry of Food and Agriculture (BMEL) under the Federal Office for Agriculture and Food (BLE) for financial support in the form of a scholarship. I also thank the Leibniz-Centre for Agricultural Landscape Research e.V. (ZALF) for supplying me with conducive working space and financial resources throughout my studies.

Special thanks go to my fellow PhD candidate, Festo Richard Silungwe. We started this journey together and whenever I was down, worried about how I would complete my studies, his words of encouragement lifted me up, encouraging me to continue through completion.

I must acknowledge my colleagues from the Sustainable Land Use in Developing Countries-SusLAND research group at ZALF for their words of encouragement, constructive comments, and criticism of the work throughout. I am indebted to Karin Stahl and Anett Jahn for their endless assistance when it came to handling administration issues, really, I could not have done it without your support.

Finally, I thank my family, particularly, my wife Martha, my son and daughter Bryan and Beatrice for their encouragement, support, and surviving my absence throughout my studies. Moreover, I extend my thanks to my Father, M, Mgeni, and my late Mother, Matilda Mgeni, for their support of my academic life. My mother would have been happy seeing me accomplish what she dreamed for me to be.

Abbreviations

ASDP	Agricultural Sector Development Program
BoT	Bank of Tanzania
FAO	Food and Agriculture Organization
GDP	Gross Domestic Product
IFAD	International Fund for Agricultural Development
PAM	Policy Analysis Matrix
SDGs	Sustainable Development Goals
TASAF	Tanzania Social Action Fund
TASOPA	Tanzania Sunflower Oil Producers Association
TEOSA	Tanzania Edible Oil Seeds Association
UN	United Nations
UNCTAD	United Nations Trade and development
URT	United Republic of Tanzania
WFP	World Food Programme
