Summary 7

Zusammenfassung 11

1 Introduction 15

1.1 Social and scientific relevance 15

1.2 Need for research and development 16

1.3 Aims and outlines 17

2 State of knowledge 19

2.1 Biogas digestate 19

2.1.1 Chemical properties 19

2.1.2 Yield effects of biogas digestate application 23

2.1.3 NUE of biogas digestate 26

2.1.4 N losses following biogas digestate application 27

2.1.4.1 N_2O emissions from digestate application 27

2.1.4.2 NH_3 volatilization from digestate 28

2.2 N_2O emissions in crop production 32

2.3 Influencing factors on N_2O formation in agricultural soils 33

2.3.1 Site conditions 33

2.3.2 N fertilization 36

2.3.3 Tillage practices 37

2.3.4 Crop rotation and cover crops 37

2.4 NH_3 emissions in crop production 40

2.5 Importance of long-term field experiments to analyze the effects of gaseous N losses and crop rotation 42

3 Long-term field experiment “energy crop rotation” in Viehhausen 43

3.1 Background information 43

3.2 Site conditions 44

3.3 Experimental setup 45

3.4 Digestate properties and application 48

4 Publications 49

4.1 Effects of organic maize cropping systems on nitrogen balances and nitrous oxide emissions 49

4.2 Artefacts in field trial research—lateral ammonia fluxes confound fertilizer plot experiments 51

4.3 Effects of biogas digestate on winter wheat yield, nitrogen balance and N_2O emissions under organic farming conditions 53

5 Discussion 55

5.1 Discussion of methods 55

5.1.1 Site conditions 55

5.1.2 Long-term field experiment “energy crop rotation” in Viehhausen 56

5.1.3 N_2O measurement system 57

5.1.4 NH_3 measurement and influence of field artefacts 59

5.2 Discussion of the experimental results 61

5.2.1 Influence of crop types on N_2O emissions 61

5.2.2 Assessment of N_2O emissions and C sequestration 62

6 Conclusion and outlook for further scientific research 66

References 67

Appendix 85

Appendix A – Publication 1: Effects of Organic Maize Cropping Systems on Nitrogen Balances and Nitrous Oxide Emissions 86

Appendix B – Publication 2: Artefacts in Field Trial Research—Lateral Ammonia Fluxes Confound Fertiliser Plot Experiments 116

Appendix C – Publication 3: Effects of Biogas Digestate on Winter Wheat Yield, Nitrogen Balance, and Nitrous Oxide Emissions under Organic Farming Conditions 137
